China Import Food Enterprises Registration (CIFER)

Application for registration i CIFER/Single Window

Disclaimer

- ***We recommend that you set aside a good amount of time to complete the application, do not rush, and read this user manual carefully.***
- This user manual has been prepared by the Norwegian Seafood Council (NSC) for the purpose of assisting Norwegian seafood companies to apply for registration in Single Window.
- The user manual has been prepared based on information available as of 19th of September 2024. New information about the application and or changes to Single Window may occur.
- It is the companies' own responsibility to fulfil requirements for application and provide information about its operations. NSC is not responsible for any errors or losses arising in connection with the use of information provided in this manual.

8. Certificate of approval. SEE NEXT PAGE FOR IMPORTANT INFORMATION

Certificate of approval (godkjenningsbevis fra mattilsynet)

1. Please check that the information (enterprise name and adress) is the same in the certificate as registered in Single window. If not, contact your local Mattilsynet office, and ask for a new one. GACC will not approve if the information is not the same. We recommend that you attach an English version of the certificate if possible.
2. IF YOU HAVE THE COMPANY NAME ON TOP WITH A DIFFERENT NAME THAN ENTERPRISE NAME:
 - You need to mark the enterprise name on the certificate.
See example on how you can do it:
 - GACC only sees the top name, and when this is different from the enterprise name registered in single window, they will not approve. We therefore need to try to get them to see the correct name.

NORWAY
NORWEGIAN FOOD SAFETY AUTHORITY

CERTIFICATE OF APPROVAL

Name: [REDACTED] AS ← (parent company, look at approved establishment below)

Address: [REDACTED]

Business registration no. [REDACTED]

Type of establishment: Freezer vessel

Approved establishment: [REDACTED] R

Approval number: [REDACTED]

Approval date: 30.11.2010

The undersigned, official officer, hereby certifies that:
Norwegian Food Safety Authority has approved the above-mentioned establishment in accordance to the relevant Norwegian legislation, which implements regulation (EC) No. 853/2004 laying down specific hygiene rules on the hygiene of foodstuffs.

Product-related information

From the 4th of September 2024 registration for “Aquatic” products has been selected as a pilot to optimize the registration forms. Therefore, its not longer necessary to add specific HS/CIQ codes for your products to the application. However, all producers are responsible to make sure your products can be found on the approved list to China before exporting. The list of aquatic products from different countries and regions that are allowed to be exported to China can be found on the website "*List of Food Exported to China from Countries or Regions that Meet the Assessment & Review Requirements and Have Traditional Trade*" (<http://43.248.49.223/>).

3. All documents should have text in English or Chinese or the application will most likely be rejected.

Floor plan should show processing areas, cooling storage and equipment if possible. We often see applications rejected because of unclear floor plans.

For specific processing methods attach a flow chart and/or a processing flow description. The flow chart should make it clear which products are produced in the process and show what raw material is used.

NB!: Based on previous experience, these attachments are required, even though it says «no» here.

To send the application press «preview» and go through the whole application before pressing «submit» at the end

after sending the application

IMPORTANT: after sending the application, you must send an e-mail to insight@seafood.no.

- Mark your email with: «Kina - nyregistrering (pakkenr [eg. TT555]) vedlegg», and confirm that you have submitted the application. **This is important as you will receive two attachments that you have to sign, stamp and send back.**
- The attachments are:
 - «*Registration Conditions and Inspection Focuses for Manufacturers of Imported Aquatic Products*»
 - «*1.3.366 Egenerklæring, Kina, Single Window, 2022-09*»
- When we have received the attachments, we can send the application to GACC for approval.

after sending the application

- **IMPORTANT:** On many occasions GACC finds different errors in the application and will send it back to the NFSA for correction. On most occasions, the NFSA then must send the application back to the company for correction. The application status will then be “to be corrected by enterprise”. This means that you have to check your application feedback (see page 23), correct the application and submit it again.
- It is important to regularly check your application status for different feedback and corrections.
- The registration is **not** complete until GACC has **approved** the application. The status of your application can be found in the system at any given time.
